Relevant Experience

Full-Stack Developer & Co-Founder @ Thrive Motors

Jan 2017 - Present | San Jose, CA

- ▶ Designed, built and deployed a fully-featured CRM, inventory and invoice management tool (handled over \$10M in sales in 2019)
- ▶ Spearheaded efforts to develop a mobile app using Google's Flutter with Elixir backend, with automated deployment using BitBucket pipelines to Kubernetes
- ▶ Implemented various REST APIs and microservices often shared between multiple customer-facing web and mobile applications running at scale
- ▶ Built from scratch a two-way Quickbooks API integration that automated most accounting tasks, along with other third-party API integrations
- ▶ Hired, organized and led a team of engineers and designers and effectively oversaw multiple projects from concept through deployment

Full-Stack Developer & Co-Founder @ Carnectify

Jan 2016 - Jan 2017 | San Jose, CA

- ▶ Initiated and owned the process of building and deploying to AWS a Lending-as-a-Service platform to connect car dealerships, lenders and consumers
- ▶ Hired and managed backend and DevOps employees and contractors
- ▶ Led the development efforts for and designed a complex, rule-based decision UI system
- ▶ Built an AI lending chatbot for consumers to find, purchase and finance vehicles directly through their favorite messaging platforms
- ▶ Devised and engineered a system to improve lenders' look-to-approve rates with real-time autobidding tools
- ▶ Integrated third party APIs like Kelley Blue Book and 700Credit
- ▶ Organized efforts to meet the industry's security and compliance guidelines

Full-Stack Developer & Growth Marketer @ Greater Access Financial

Jan 2014 - Jan 2016 | San Jose, CA

- ▶ Created and deployed a dealer-facing web portal on top of Salesforce API that increased application processing speeds by 3x and cut response times by 70%
- ▶ Developed a consumer-facing system for online payments and real-time loan updates that decreased customer support requirements by 30%
- ▶ Implemented an automated decisioning system on top of Salesforce using Apex, increased number of loans generated by 25%
- ▶ Designed marketing materials for digital and print

UX/UI Design & Front-End Development @ Freelance

Aug 2012 - Jan 2014 | San Jose, CA

- ▶ Developed and launched marketing websites and landing pages for clients across a variety of industries
- ▶ Created flyers, logos, brochures and other materials for both digital and print
- ▶ Provided consultative UX/UI strategy and feedback

Skills

Languages

JavaScript (ES6), HTML5, CSS/Sass, GraphQL

Some experience: Python, C#

Libraries & Frameworks

React, React Native, Redux, Gatsby, Next.js, Node.js, Express, Apollo, Bootstrap, Jest, ARKit, TypeScript

Tools & Platforms

Git, Webpack, ESLint, Prettier, Netlify, Heroku, Hasura, AWS, Zeit, Sketch, Adobe Suite, Figma, Unity

Projects

q2o.ai

Inventory management mobile app with QR code generator and scanner. Built with React Native on top of a real-time GraphQL API, connected by Apollo to PostgreSQL and Hasura.

writesolo.com

Minimalist note taking and distraction-free writing web app built with React. Apollo handles state and data management. Hasura over PostgreSQL manages real-time GraphQL APIs in the backend.
